AWS Cloud Computing and Devops

About the Program:

Our Cloud Computing & DevOps Program offers an in-depth look at the cloud world, covering everything from networking to AI integration.

You'll get hands-on with AWS, mastering skills in automation, security, and DevOps. Plus, you'll dive into AI's role in cloud computing and learn to build innovative cloud-based SaaS applications.

Program Highlights

Industry-Relevant & Updated Syllabus

Learn the industry's latest tools, techniques & trends. Gain hands-on experience developing various apps.

360 Degree Knowledge Building

Develop practical skills through real-world projects and assignments

1:1 Dedicated Mentorship

Personalized learning experience from experienced industry professionals.

Multiple Career Opportunities

We don't just educate; we guide you towards your career goals with our dedicated placement pool.

Program Details

COURSE PREREQUISITE

Basic understanding of IT and software with foundational knowledge in networking is required

PROGRAM ELIGIBILITY

- ✔ **IT Professionals:** Ideal for IT administrators, system admins, network engineers looking to upgrade their skills.
 - ✔ **Software Developers:** Beneficial for developers aiming to specialize in DevOps practices and cloud solutions.
 - ✔ **Career Changers:** Open to professionals from different backgrounds seeking to transition into the IT and cloud domain.
-

KEY FEATURES

- ✔ Practical exercises, real-world projects, and lab sessions using AWS, Azure, Docker, and Jenkins.
 - ✔ Dedicated Placement Cell | 100% Guaranteed Interview calls
 - ✔ Globally Recognised **Certification from Microsoft**
-

JOB ROLES TO TARGET

Cloud Engineer	Cloud Architect
DevOps Engineer	Automation Engineer
Site Reliability Engineer (SRE)	Infrastructure Engineer
System Administrator	Cloud Security Specialist

Learnbay's ProjectLab

Choose Learnbay for your career journey because we're more than just a training provider. Our Project Innovation Lab lets you apply your skills in real-world scenarios. Get **dual certifications** for a competitive edge. Discover how Learnbay can boost your career growth. Don't settle for less – choose Learnbay, your path to success!

1 Project Innovation Lab

Work in an industry like environment and gain practical hands-on experience of cloud specialist with dedicated mentors from industry.

2 Dedicated Placement Cell

Experience 100% job assistance with guaranteed interview call from leading MNCs and startups globally.

3 Certification

Gain top-notch skills for a successful career through our certification

1 Project Innovation Lab

Learnbay's Project Innovation Lab replicates industry like environment for real time projects. With our **ProjectLab**, you gain real proof of hands-on experience by having your project certified by the industry.

2 Career Service

Get 1 Year of Job and Placement support

Unleash your career potential with 1 year of unlimited job access, interview support, and profile review.

1 Mock Interviews with Industry Experts

Master the art of Cloud Computing & Devops I and stay ahead of the curve with mockups and industry insights

Resume Building Session

Craft a powerful resume showcasing your expertise in software development to stand out from the competition

4 Interview Calls

Receive 4 interview calls from a diverse pool of interested employers/recruiters.

3 Industry Certification

Learnbay Course Completion Certificate

Earn a Learnbay-certified AWS Cloud Computing & DevOps certificate,

Linux Fundamentals and Introduction

10 Hours

Linux Basics and System Administration

- Introduction to Linux Operating System
- Command Line Interface (CLI) Essentials
- User and Group Management
- Networking Basics in Linux

Practical exercises and assignments for mastering Linux commands

- Command Line Mastery: Exercises focusing on everyday CLI usage
- Script Writing: Basics of Shell Scripting for Automation
- System Administration Tasks: Setting up a Web Server, Creating Cron Jobs

Tools covered

LINUX

Python Programming Essentials

25 Hours

Introduction to Python and Environment Setup

- Basics of Python Programming Language
- Setting Up Python Development Environment
- IDE Setup and Introduction (PyCharm, Jupyter Notebook)

Python Programming Foundations

- Data Types, Variables, and Basic Operators
- Control Structures: If-Else Statements, Loops
- Functions: Definition, Arguments, Return Values

Tools covered

jupyter

PyCharm

Data Handling and Structures

- Lists, Tuples, Dictionaries, and Sets
- String Manipulation and Regular Expressions
- File Operations: Reading and Writing Files

Real time project will be covered after Python completion with 2 hours of assessment (coding and objective questions)

Python Programming Essentials

Advanced Python Concepts

- Object-Oriented Programming (OOP) in Python
- Classes, Objects, Inheritance, and Polymorphism
- Encapsulation and Abstraction
- Exception Handling and Debugging Techniques
- Modules and Packages: Importing and Creating

Project Work and Practice

- Hands-on sessions with Python scripting and automation projects
- Real-world problem-solving using Python
- Mini-projects: Developing small-scale applications or scripts

AWS Cloud Mastery

40 Hours

AWS Administration Level

Introduction to AWS

- AWS Services Overview
- Setting Up AWS Accounts
- AWS Management Console

AWS Storage Services

- S3 (Simple Storage Service)
- EBS (Elastic Block Store)
- Glacier
- Storage Gateway
- Amazon FSx (Fully Managed File Storage)

Networking and Content Delivery

- VPC (Virtual Private Cloud)
- CloudFront
- Route 53
- API Gateway
- AWS Direct Connect

Monitoring and Management

- CloudWatch
- CloudTrail
- AWS Config
- AWS Trusted Advisor

AWS Compute Services

- EC2 (Elastic Compute Cloud)
- AWS Lambda
- Elastic Beanstalk
- Lightsail
- Amazon ECS
- EKS (Elastic Kubernetes Service)

AWS Database Services

- RDS (Relational Database Service)
- DynamoDB
- Redshift
- ElastiCache
- Amazon Aurora

Automation and Optimization

- AWS CLI (Command Line Interface)
- CloudFormation
- Systems Manager
- AWS Elastic Beanstalk for Deployment Automation

AWS Cloud Mastery

Transitioning to Solution Architect

Architecting on AWS

- Designing Systems (Availability, Cost-Efficiency, Fault-Tolerance, Scalability)
- Decoupling Mechanisms and Scalable Design
- Choosing Appropriate AWS Services

Advanced Networking

- VPC Design and Implementation
- Advanced Security and Networking Best Practices

High Availability and Business Continuity

- Disaster Recovery Strategies
- High Availability Approaches

Migration and Innovation

- Migration Strategies to AWS
- Leveraging AWS for Innovation

Data Security

- Data Encryption Methods
- Compliance and Governance

Cost Optimization

- Cost-Effective Resource Utilization
- Monitoring and Optimization Techniques

Designing for New Technologies

- IoT (Internet of Things) Solutions
- Machine Learning Implementations
- Serverless Architectures

DevOps Expertise

Introduction to DevOps

DevOps Overview

What is DevOps, Benefits of DevOps, DevOps lifecycle, Key principles

DevOps Culture and Collaboration

Differences between DevOps and traditional models, DevOps culture and mindset, Team roles

Version Control

Introduction to Version Control

Importance of version control, Version control systems (VCS)

Git Basics

Git setup, Git workflow, Branching and Merging, Tagging, Git commands

GitHub & GitLab

Repository management, Collaboration, Pull Requests, Webhooks

Continuous Integration (CI)

CI Concepts and Importance

What is CI, Benefits of CI, Overview of CI tools

Jenkins

Jenkins installation, Jenkins Pipeline, Jobs, Plugins, CI/CD pipelines

GitLab

GitLab CI configuration, YAML syntax, Runners, GitLab CI/CD pipeline

DevOps Expertise

Build and Release Management

Build Automation

Introduction to build automation, Build tools (Maven, Gradle), Build automation for CI

Package Management

Package repositories (Nexus, JFrog Artifactory), Managing dependencies

Release Management

Release strategies, Managing releases in Git, Versioning

Continuous Delivery (CD) & Deployment Automation

CD Overview and Tools

Continuous delivery principles, Differences between CI and CD

Deployment Automation

Infrastructure as Code (IaC), Benefits of automation, Tool overview (Ansible, Terraform)

Ansible Basics

Ansible playbooks, Inventory management, Modules, Roles

Terraform

Terraform basics, Writing configuration files, State management

DevOps Expertise

Container Orchestration Basics

Introduction to Containers

What are containers, Benefits of containerization, Introduction to container orchestration

Kubernetes

Kubernetes architecture, Pods, Services, Deployments, Namespaces, ConfigMaps, Secrets

Helm

Helm basics, Charts, Repositories, Managing Helm releases

Continuous Monitoring

Monitoring and Logging Concepts

Importance of monitoring, Metrics, Logging basics

Prometheus and Grafana

Prometheus installation, Metrics collection, Grafana dashboards

ELK Stack (Elasticsearch, Logstash, Kibana)

Setting up ELK, Log collection and processing, Visualizing logs in Kibana

Real-time Projects

Project: 01

AWS Migration Project for E-Commerce:

This project focuses on migrating e-commerce systems to AWS, optimizing for scalability and reliability, and includes streamlining the checkout process and data storage solutions.

EC2

RDS

Amazon CloudFront

Project: 02

Healthcare Data Management with Kubernetes:

Deploying a Kubernetes solution for healthcare data, this project focuses on enhancing data handling efficiency, ensuring security compliance, and improving patient data accessibility.

kubernetes

docker

Project: 03

Banking Cloud Security Enhancement:

This project strengthens the banking cloud infrastructure by implementing advanced security protocols and real-time threat detection mechanisms to protect sensitive financial data.

aws

Azure Security Center

Project: 04

Event Management Serverless Solution:

Creating a serverless architecture for event management, this project aims to improve scalability and cost-efficiency, focusing on automated event scheduling and attendee management.

AWS Lambda

Amazon API Gateway

DynamoDB

Real-time Projects

Project: 05

SaaS Application Containerization:

This project transitions a suite of SaaS applications to a containerized environment, focusing on enhancing deployment speed and application scalability.

kubernetes

docker

Project: 06

Insurance Software DevOps Transformation:

Implementing DevOps practices in insurance software, this project aims to streamline operations, enhance software quality, and accelerate product releases.

Jenkins

git

ANSIBLE

Project: 7

Hybrid Cloud Setup for Manufacturing:

Establishing a hybrid cloud setup for a manufacturing environment, the project focuses on integrating on-premise systems with cloud resources for better data management and operational efficiency.
